Customers

RIoT International has provided technology services and guidance to the following companies.

1 Margaret River Home Hardware

Margaret River HOME Timber & Hardware is owned by locals Anne & Lloyd Shepherdson and has been operating for over 30 years; prides itself on its product knowledge and customer service and is the number one destination point for the Tradie and DIYer.

2 Margaret River District Club

The Margaret River District Club has been a favourite meeting place for the locals and visitors alike - nestled in the heart of Margaret River in WA's south west this charming and newly developed club has everything anyone is looking for in a social and friendly atmosphere.

3 Biosync Technology AB

Biosync Technology is an innovation company based on the research within the biometric sensor field over over 10 years by the Swedish Institute of Computer Science and Mobile Life VINN Excellence Centre in Stockholm, Sweden.

4 Millseed Pty Ltd

Millseed is a research and development company involved in a wide range of technologies geared towards the water industry, from basic logging equipment to the development of cutting edge analytic systems.

5 Kocoverk Mobile Tech Ltd

Kocoverk offer a brand new set of wireless remote-control functions to reduce costs and improve GSE work-process efficiencies. The system will allow personnel to remote control start and stop of GSE equipment and at the same time see its position and status.

6 Evothings AB

Evothings is a mobile application enabler for the Internet of Things (IoT) industry, helping developers and technology players that have the need to create and prototype mobile applications and deliver services that interface with their technologies.
